

PGM EVP 1.16 Software Release Notes

Version 1
2022-09-23

Introduction

Swift Navigation is pleased to provide the latest software release for the PGM EVP, Swift's Precision GNSS Module Evaluation Platform. PGM EVP 1.16 updates existing features, adds enhancements for better user experience, and fixes known issues.

Enhancements and Changes

- Updated software packages:
 - Starling v1.16.2
 - PGM firmware v1.3.2
- Starling configuration file updated with new settings:
 - Skylark endpoints updated for all regions

Installation

The PGM EVP software package and installation instructions are posted on the support portal:

swiftnav.com/support -> [General](#) -> [Downloads](#) -> [PGM Evaluation Kit Software](#)
